

The Open Source Elastic Stack

Reliably and securely take data from any source, in any format, and search, analyze, and visualize it in real time.

Kibana

Visualize your data.
Navigate the Elastic Stack.

Kibana gives shape to your data and is the extensible user interface for configuring and managing all aspects of the Elastic Stack.

Elasticsearch

Search, analyze, and store your data.

Elasticsearch is a distributed, JSON-based search and analytics engine designed for horizontal scalability, maximum reliability, and easy management.

Ingest any data, from any source, in any format.

Beats

Beats is a platform for lightweight shippers that send data from edge machines to Logstash and Elasticsearch.

Logstash

Logstash is a dynamic data collection pipeline with an extensible plugin ecosystem and strong Elasticsearch synergy.

Extend What's Possible with X-Pack

Built and maintained by Elastic engineers, X-Pack is a single extension that integrates handy features you can trust across the Elastic Stack.

Security | Alerting | Monitoring | Reporting | Graph

You Host. We Host. You Pick with Elastic Cloud.

Public cloud, private cloud, or somewhere in between — we make it easy for you to run, scale, and manage the Elastic Stack and X-Pack.

Elastic Services and Subscriptions

When you're using the Elastic Stack to do remarkable things, you may find yourself in need of a remarkable team to back you up. Whether you want to go to market faster or push your data further, our support, consulting, and training have you covered.

Support

We offer a support experience unlike any other. Our team of professionals speak human and code, and they love open source, making your day, and crushing response times.

"Even though I have a PhD in computer science and I've been doing search applications since 1998, I still get a lot of value out of support. Even after two years, I'm just running into more interesting challenges, and it keeps paying off."

Geena Rollins,
Senior Software Engineer
Symantec

Consulting

It's on-site, dedicated resources for you: consulting puts an Elastic expert at your side, helping you accelerate timelines and solve your biggest business problems.

"When you're really trying to address those complex problems that you weren't able to solve by yourself, consulting can come in, sit with you, and help build those solutions."

Thom O'Connor,
Vice President of Services
Elastic

Training

Become the Elasticsearch, Kibana, Beats, or Logstash expert with hands-on learning from experienced Elastic engineers. Get ready to make the Elastic Stack go to work for you, your team, and your business.

"Elastic instructors are great speakers. They have a wide and deep knowledge about the topics, and they know how to pass it on."

Mariusz Kuskowski
Allegro Group
